

Press Release

AnaCise Announces Successful Exhibition at the IPTV Worldforum UK Conference

We, AnaCise Technology, are honored to announce our success in 2010 IPTV Worldforum last month. All visitors have impressed by our next-generation handheld tester in Triple Play service testing and measuring, we are also appreciated their time to realize our total solutions in IPTV.

CSN (Convergent Service Navigator) has unveiled at the IPTV Worldforum with it's below outstanding and innovated functions which makes amazing to all visitors.

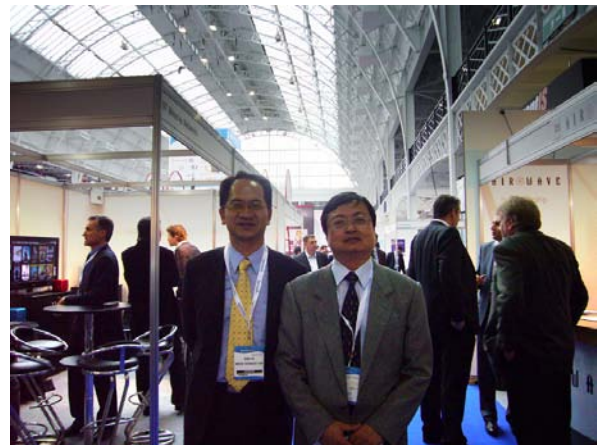

- H.264 HD video stream analysis with playback to have the way of "To See is To Believe".
- With A/V In support allows to substitute for TV set.
- Inter-TV mode bring a new concept about IPTV troubleshooting especially in VoD
- One-touch designed of CSN has inspired all visitors' experience.

Another product deserves to be mentioned is WatchiTV, it's an IPTV monitoring system and supports up to 2Gbps traffic analysis with a plentiful statistics/reports about IPTV performance. Most visitors show favor to it because it's friendly user interface and plentiful analysis information, the at-a-glance view of 1024 channels is absolutely a benefit for IPTV operators.

This opportunity has not just showed our success, but also revealed the new age of network is coming because IPTV will be the killer application. IPTV has now pushed telecoms and service providers to upgrade their network in order to keep QoS promise to subscribers. An intelligent and full function handheld tester is the way to help them keeping promise to customers, and guarantee the course of bringing TV to IP networks. In addition, it has proved CSN and WatchiTV are the answers.

Chunghwa Telecom, is largest telecommunications company in the Republic of China, is now a leading IPTV service provider in the worldwide. At this opportunity, we are honored to have Chunghwa Telecom's MOD director named Dr. Chen, Jing-Ming attended as a speaker for IPTV Worldforum and customer of AnaCise CSA and WatchiTV solutions. Dr. Chen has also champ at the bit to have a trial of CSN because it's originality in VoD troubleshooting and CSN brings a cost-effective way to create a facility of Proactive IPTV Performance Management.

■ About AnaCise

ANACISE TESTNOLOGY is a Taiwan-based company with HQ office in Taipei. We are at the forefront of helping our customers shape the changing broadband convergent technology landscape.

AnaCise's solutions enable network operators and service providers to better meet increasing demands for network availability and services. We accomplish this by providing market-driven test, measurement and monitoring solutions that accurately verify network performance, thus ensuring perfect telecommunications network planning and service continuity.
